CAREER OBJECTIVE

Integrated M.Sc. Information Technology graduate from Anna University with hands-on software development internship experience. Proficient in **Python, Full-Stack systems, and core computer science fundamentals**. Strong analytical and quantitative problem-solving skills with an active foundation-building in **Web3, Blockchain fundamentals, Smart Contracts, and basic Solidity**. Eager to contribute as a Software Engineer in high-performance technical ecosystems.

TECHNICAL SKILLS & COMPETENCIES

Programming:	Python
Operating Systems:	Linux / Unix environments, Shell/Bash Scripting, Windows
Blockchain & Web3:	Web3 Fundamentals, Smart Contracts Architecture, basic Solidity, DEX/DeFi Concepts (Currently learning & building basics)
Software & Full Stack:	Node.js, Express.js, React.js, RESTful APIs, PostgreSQL, HTML5/CSS3
Data & Quantitative:	Data Analysis, Microscopic Image Data Processing, Scikit-Learn, PyTorch
Tools & Workflows:	Git, GitHub, Linux CLI, Postman, Debugging & Tooling, Agile Development

PROFESSIONAL EXPERIENCE

Software Development Intern | CSTF, IIT Madras Jan 2026 – May 2026

- Engineered and deployed a robust full-stack fleet management platform using Node.js, Express.js, React.js, and PostgreSQL for 100+ active institutional users.
- Designed RESTful APIs, asynchronous logic, JWT authentication, and Role-Based Access Control (RBAC) to manage automated multi-level approval workflows.
- Maintained high system reliability on Linux servers through systematic debugging, endpoint validation, and automated email trigger integrations.
- Utilized Git and GitHub in an Agile collaborative workflow for feature branching, code reviews, and issue tracking.

Software Development Engineer Intern | Atsuya Technologies Pvt. Ltd. July 2024 – Dec 2024

- Developed and deployed custom features, plugins, and PHP/JavaScript integrations on web systems, cutting manual admin overhead.
- Implemented structured data, schema markups, and Linux web setup optimizations to significantly increase technical performance and visibility.

KEY PROJECTS & RESEARCH

Smart Fleet Management & Authentication System | IIT Madras

- Architected centralized web portal integrating LDAP-based authentication for seamless institutional credential verification.
- Programmed real-time availability checking, driver assignment algorithms, audit logging, and conflict prevention modules.
- Executed thorough functional testing, API route debugging, and load validation on Linux-based environments.

Blood Cell Classification using Vision Transformer (ViT) | Python, PyTorch, Hugging Face

- Performed quantitative data processing and statistical evaluation on microscopic blood cell datasets.
- Trained Vision Transformer (ViT) models to classify white blood cell types, analyzing performance via precision metrics, confidence scores, and accuracy tracking.

Real-Time Baggage Tracker Prototype | Embedded Systems / LoRa / ESP32

- Designed a low-cost, real-time wireless tracking prototype, cutting hardware cost by 70% compared to commercial GPS solutions.

TECHNICAL FOCUS & CONTINUOUS LEARNING

- **Blockchain & Web3 (Basic Foundation):** Actively learning Web3 protocols, decentralized exchange (DEX) mechanics, Smart Contract architecture, and basic Solidity programming.
- **Advanced AI & Systems:** LLM tokenization, embeddings, RAG vector search, and high-concurrency async programming in Python.

EDUCATION

Master of Science (Integrated) in Information Technology	— Anna University, Chennai CGPA: 7.00	2021 – 2026
Higher Secondary Certificate (HSC)	— Sri Jayendra Matric. HSS, Trichy Score: 92%	2020 – 2021

LEADERSHIP & COMMUNICATION

Leadership Roles: Vice Chairperson (Dept. of Mathematics, 2025–26) | General Secretary (NSS Unit-6, 2023–24) | Rotaract Volunteer

Languages: English (Proficient - Written & Verbal), Tamil (Native), Malayalam, Hindi (Intermediate)
